Assessor Comments A line of 40 Friesian steer calves that are vendor bred from the vendor's dairy herd of 450 large frame friesian and the odd X bred cows. These steers are backed by years of AI breeding in the herd with the vendor only keeping his top

replacements every year. The calves have already been weaned, marked, vaccinated, drenched and 7 in 1 so all the hard work has already been done for you, just tip them out and watch them grow. These steers would ideal cattle to grow out for backgrounder steers or could be grown out for the export market. There was 10 steers observed as having old pink eye scarring at assessment.
