Vendor Comments	Turnoff of quality wether lambs to make room for breeding ewes.
Assessor Comments	Offering 440 VGQ Australian White Wether Lambs. These lambs averaged 33.3kg live at assessment and are majority Aug-Sept 2021 lambs with a small percentage of older lambs born in June - July. The lambs are high content Australian Whites with most coming out of 5th generation Australian White ewes and sired by Tattykeel bloodline rams. This is a good opportunity to secure well bred lambs that will go forward for the purchaser and have plenty of time to make heavy slaughter weights. Please note there were seven wethers sighted with colouration of varying description (please see photos), one sighted with a slight undershot jaw, and 2 with long tails but have been previously marked. Also please note there were some lambs showing signs of light scabby mouth at the time of assessment but still in good condition.
