Assessor Comments	A very good quality line of F2 ewe lambs in forward to prime condition. SheepMasters are a high fertility shedding breed that puts emphasis on sound structure as well as carcass, and these ewe lambs are certainly true to type. They are growing rapidly and will be ready for joining soon enough. These ewes are part of dispersal of vendors commercial flock, as they start to focus on their "Wild Oat" Sheepmaster stud. A small % of this mob show remnants of primary photosensitisation. Odd ewe with brown spots on face and legs. There are also 375 autumn drop ewes to be offered as 3 lots of 100 and 1 lot of 75, a run out the gate, in same sale.
