Assessor Comments	These 580 lambs present very well in forward store condition. Lamb are bred from two well known breeders with the Dams being Stud Park South Merino ewes and the sires Jackson's Polled Dorset rams. NOTE that there has been a 15% tail taken out of these lambs. These lambs are fit and healthy and the only reason for there sale is that they are surplus to the vendors farming enterprise. Lambs are still short in the skins they have had Clicked on their breech 25/11/21. These lambs would do well in feedlot or back to the paddock with being trail feed oats and beans at 1kg per head. You don't won't to miss a great opportunity to purchase some lambs that are almost there with some already at kill weights and some just needing a little more time.
