Assessor Comments	The lead draft of the Sterling lambs. Nicely presented and well weighted late drop, shorn, vendor bred terminal & composite x lambs. Presenting in healthy store to forward store condition, lambs are a late August/September drop, and are up to date with vaccinations including 6-in-1 booster & Scabigard. It must be noted, they have shown terrific weight gain since weaning. The Sterling Pastoral operation sources top end Cashmore Oaklea genetics with particular focus on growth, meaning these lambs, if given the opportunity will finish to heavy trade or export weights. With vendor offering over 800 lambs this sale that have been 100% weighed into two lines, it represents a great opportunity to purchase well bred, late drop lambs that can be taken all the way through to late autumn or winter markets (NOTE: Nutrien Timboon are offering around 3200 locally bred, late drop crossbred lambs this sale, both shorn & in the wool that may help trucking arrangements).
