Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.		
Assessor Comments	Offering 277 late drop lightweight store lambs. Presenting in healthy store to forward store condition, the Glenample flock has consistently acquired the best genetics available over many years with a focus on above average growth & carcase traits & sheep robustness. Lambs are up to date with vaccinations and had a recent drench. They are generally moderate statue, deep bodied, heavy boned sheep, with previous purchasers finishing lambs to export weights in the winter. These lambs are not normally offered to market at this time of year, but tight season has required the need to make room. A chance to tuck away some genuine late drop lambs with plenty of breeding that are bred to perform. (NOTE: vendor also offers 133 Composite ewe lambs this sale & 409 young ewes 16-17 months in National Sheep Sale) (NOTE: Nutrien Timboon are offering around 3200 locally bred, late drop crossbred lambs this sale, both shorn & in the wool that may help trucking arrangements).		
Assessor	Nick Maddison (Level 1 Accredited)
