Comment on Fat Score 1 Sheep Ewes are strong and fit to travel. They present in forward store to forward condition as a group.

Mulesed Yes  
 Pain Relief Yes  
 Mulesing Types Moderate: 100%  
 Shearing Info Shorn 12 Nov 2021 Not Crutched  
 Wool Length 100% 0.25 - 0.5"  
 Majority Length 10 Millimetres  
 Degree Burr Nil  
 Degree Seed Very Light Type: Dock on small percentage of heads  
 Wool Cut Year 2021 Result 4 kgs  
 Micron Test Year 2020 Result 19 micron  
 Yield Year 2021 Result 72 %  
 Shedding Breed Contact No known contact with shedding breeds  
 Skin Comment Skins carried good nourishment. Old water damage was evident just on the tip of the skin in approx 30% of mob. Ewes have had close to 200mm on them since shearing and handling weather well.  
 Wool Comment Clean and bright for early stages of growth.

Vendor Bred Yes  
 Stock History Very good local flock. Vendor purchases above average price rams annually at stud sales  
 Bloodlines Majority of ewes are Yarrowonga blood. Approx 30% would carry Poll Boonoke genetics from change in bloodline direction in recent years.

| Preg Scanned?          | No, this lot was not pregnancy scanned.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Assessor Comments      | Top quality line of Station Mated Maiden ewes. This represents an annual sale of surplus ewes in the moonbi flock. They are bred from solid medium to larger frame ewes and carry heavy cutting fertile genetics. Progeny from these ewes are annually grown out to export weights. Annually classed by Chris Bowman these ewes would make ideal terminal mothers. They present in forward store to forward condition, showing plenty of frame and have been on quality improved pastures for the joining period. Ideal to generate early cashflow with the pregnant portion and rejoin the balance to a ram of your choice. A 20% tail was visually drafted out before assessment. 5% noted with horn or scur at assessment |
