Mulesed Yes , Details: A small percentage of Ewes (5%) have only a light mulse
Pain Relief Yes
Mulesing Types Light: 5%
Radical: 95%
Shearing Info Shorn 15 Apr 2021 Crutched Type: Market
Wool Length 100% 3+ "
Majority Length 80 Millimetres
Degree Burr Nil
Degree Seed Very Light Type: A small % of ewes carry Dock which is mostly visible on bellies and legs
Wool Cut Year 2021 Result 4.5 kgs
Micron Test Year 2021 Result 26 micron
Shedding Breed Contact No known contact with shedding breeds
Skin Comment Clean x-bred skins
Wool Comment Long X-Bred wool with slight dust penetration at tip ready to be shorn. Whilst assessing there was a handful of Ewes that have a little bit of dermo mostly in the shoulder area but this had not affected the skin.

Vendor Bred No
Vendor has owned stock for More than 12 months
Stock History 30% of Ewes were purchased in November 2020 through AuctionsPlus whilst the remaining 70% are bred by the vendor.
Bloodlines Vendor bred Ewes are Woolaroo Blood and rams are Deepwater B/L Rams. Bought in Ewes are Stavely Park Blood Merino

Grazing Conditions	Dried off improved pastures consisting of mainly ryegrass and phalaris supplemented with silage. Returned same							
Introduced Sheep	1-5 sources of sheep have been introduced onto the consignment property in the last 5 years							
Footrot	All consigned sheep are from a flock that is free of Virulent Footrot Consigned sheep are from a flock that is NOT free of Benign Footrot or Scald Further Information: During the late Spring months a small % of Ewes concur slight scald which is common in the area. The assessed Ewes had no sign of feet issues and have been running on paddocks that were cut for hay and silage minimising most feet issues such as scald Feet were inspected at assessment. Inspected 10 head (5%) Comments: A small % of feet were inspected mainly to take photos for prospective buyers and all had solid feet with no signs of redness or seed between toes							
Lice	All consigned sheep are from a flock that is free of Lice							
WHP/ESI	Sheep are within a Withholding Period or Export Slaughter Interval for: Trifecta							
Health Treatments	Drenched	03/01/2022		Trifecta				
	Other Treatment	14/01/2022		Abbey blowfly and Lice				
Health Declaration	A National Sheep Health Declaration will be provided at Delivery AT BUYER REQUEST							
JD Approved Vaccinates	Sheep are JD Approved Vaccinates.							
Other Health Information	These Ewes are getting Jetted on the 14th of January for Blowfly and Lice. This is a precautionary measure as the vendor has recently found a small % of Ewes with body strike and wants to avoid anymore problems going forward.							
Vendor Comments	Only offering these Ewes due to the sale of our property							
Joining Details	Not Station Mated							
Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.							
	Frame		Quality Grades		Wrinkle Score		Carcase Quality	
	A (71+cm)	50%	Very Good	70%	Plain	100%	GAQ	70%
	B (66-70cm)	30%	Good	30%			FAQ	20%
	C (61-65cm)	20%					PLQ	10%
Assessor Comments	On behalf of the Roads family is the final stage of their flock dispersal comprising 380 Aug/Sept 2019 Drop Border / Merino 1st cross Ewes being offered as 2 lots of 190 run out the gate. An opportunity presents to purchase high quality Ewes in the absolute prime of their lives as they present in ideal joining condition and also the ability to generate a healthy lambing percentage. On that note these Ewes marked 125% lambs this year and were all joined to the Southdown and White Suffolk with majority of lambs making in excess of \$185 as a Spring Drop lamb. All Ewes are April 2021 shorn, Mulesed and Gudair Vaccinated with a tail being drafted out to give the prospective purchaser and even line of mostly Score 3 and 4 Ewes. An opportunity not to be missed these Ewes are realistically reserved as they must go. *Please Note Ewes were being jetted on the 14th of January to control bodystrike which incurs a 6 week withhold for shearing*
