Handled With	Small % of steers stirred up when mouthing them but settled into the mob when released. Bikes , On foot , Vehicles
Assessor Comments	An even line of feeder steers Angus and Angus cross. These steers all mouthed milk teeth and were the top third of the mob all weighing above 460kg full. They were purchased as yearling steers and are predominately Trio and Booroomooka bloodlines. 3 steers had a blue scar on one eye, 6 had small amount of white on cod, 3 steers had light ringworm around head, 3 steers had very small amount of warts. The Pink paint on high bone indicate steers weighing between 460-469kg. These steers are powering along, showing good frame and constitution.
