Assessor Comments

Front paddock top quality vendor bred Angus heifers. Hazeldean and Reiland blood heifers displaying the results of years of genetic selection. Only 5 heifers were retained from the complete drop of 28hd. The retained heifers were only selected due to not being genetically related to one sire on the property. These heifers are typically classed with only the best retained. The temperament of these weaners is second to none. They are a pleasure to handle being beautifully quiet. With correct stock sense and management there is no reason they will differ once they leave the property. These heifers are ideally suited to start or add to any breeding herd or even as a trade option to grow out and join for future breeders. The dams are large framed and have produced weaners that have performed well for previous buyers. An opportunity that has presented due to having an adequate number of breeders. Weaned and health treatments up to date. Should you require any further information please call.
