	Rangeland Bred Cattle, majority are slightly stirry but are reasonable to work with if handled in a quiet manner. They are usually free flowing cattle & will need steadying through gateways. They have only been Race Drafted & haven't been worked on foot in confined spaces, so could panic or become aggressive if pressured.					
Assessor Comments	70 Vendor Bred PTIC Crossbred Cows. Ideal Cows to calve down, split & fatten. The better end of the Cows would suit to keep for longer term breeding. They have been bred in Rangeland Country in the NT so can handle most types of Country. They were trucked to Stamford late in 2021 & will fill up on good feed. They were VET PTIC at assessment & were all identified with a Bangtail. There are 63 Cows over 4 months & 7 Cows under 4 months in Calf. There are 10 Brindle coloured Cows. There is 1 Cow with Blue Eye Scarring in 1 Eye, 2 Cows with Small Dog Bites on their legs & 9 Cows with Hip Offs that aren't affecting their movement. Vendor has another 39 PTE Cows listed in the same Sale. Cows could cut up between assessment & delivery due to rain on the 19th of January. *Majority were Backlined on the 15th of December with Baymec Pour On, so are still in a WHP & ESI until the 26th of January.*
