Assessor Comments	Vendor bred PTIC heifers. These heifers were joined to Rennylea Angus bulls specifically selected to join to heifers (refer photos for bull data). These heifers were joined from 6/07/21-01/09/21 for an April/May calving period. At weaning these heifers were classed out for simply being lighter in weight at the time. They have had access to quality feed since and have grown out nicely. These heifers are a good weight and are in ideal condition and only require maintenance until calving. These heifers worked well through the yards responding correctly to pressure and moving as required. Please note vendor is offering 62 PTIC heifers in various lots joined to the same Angus bulls for the same period and 20 PTE sisters in todays sale.
