Assessor Comments	Nice line of PTIC Angus heifers from the Pickup Pastoral Company, these heifers are account the breeder and are being sold as part of a complete herd dispersal as the property has been sold. The herd has been based on Landfall Genetics for the past 15-20 years and no money has been spared on the purchase of bulls over this time. They have been joined to Rennylea P537 from 10/5 to 1/10, P537 is rated 0.6 for his birthweight, and they present as medium to large framed heifers in ideal calving condition. These heifers are not the quietest heifers, but with handling they should be fine as the older cows in the herd are a pleasure to handle.
