|                    | Cattle were a bit agitated when assessing. Not hard to handle but moving about and pushing up the race. The very blustery conditions would not have helped plus the fact they have been preg tested very recently. Vendor said they were well behaved at preg testing and have not caused any grief in the past.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                           |                                     |

| Assessor Comments  | Another great line of PTIC Heifers from the Johns Family, who have specialized in marketing quality Angus females through A+. ( 65 Lots have been sold through A+ in the last 4 Years with many satisfied - and repeat - Buyers, vindicating the success of the program. ) This is a One Mark line of 48, being sold as Two Runs out the gate to give all Buyers an opportunity. These Heifers were purchased from a noted Western District Angus herd operated by the Condon Family at Coddington, who use principally Lawsons bloodlines. They have been faithfully joined to LBW, High calving ease Bulls specifically selected for Heifer joining. The heifers are well grown and full of bloom, due to calve April / May. There is no doubt they will develop into top Angus Cows that will give many years of service for the successful Purchaser. |                                           |                                     |
