	C (61-65cm)	40%	Very Good	20%				
Assessor Comments	An outstanding run of the NM & JK Smith, Lambpro blood 2021 drop ewe lambs.This is the annual sell off of the drop, which forms a major part of the families production program. The flock has been purchasing Lambpro replacements for 10 years and have a flock which is incredibly consistent in the visual type produced and boasts high fertility and percentages from marking to weaning. The wether portion easily fit the spec of a high end domestic lamb at an early age and definitely grow out to heavy export weights when allowed. This line totals 250. They are a draft of slightly smaller framed & lighter weight ewes, off of the top 690. Regardless they are still very even in frame, shape, head & weight. They are well boned, strong on their feet and have a nice fat cover. They are prime to join within the next 6-8 weeks, for a Jul/Aug lamb and will remain wonderful breeders for the next 5 years. Outstanding quality & highly recommended. A further 690 (3 x 230) being sold in this same sale.
