Assessor Comments	Offering 460 station mated Dorper/White Dorper Cross Ewes. These ewes averaged 57.4kg live at assessment after a big curfew having weaners pulled off them the previous day. These ewes are all only young and are ready for their prime breeding years with the mob just weaning 100% from ewes joined as maidens. The ewes are showing various lengths of cover on their back but have never been crutched or shorn so have been easy care to date. These ewes have been station mated to quality Bellevue White Dorper Rams and I would recommend looking at the lamb sale to see the wether lambs that were just weaned from these young ewes. Don't miss this opportunity to purchase productive young ewes that will produce good even lambs. Please note at assessment 1 ewe was sighted with an undershot jaw and 4 with light ewe horn.
