Assessor Comments	A very good quality line of Australian White ewes, scanned 164% in lamb to the Kalnari Aussie White rams. These ewes are the 2nd cross progeny out of Highveld Aussie White / Etiwanda White Dorper ewe. They are the last of their age group, having been retained for their fertility, and productivity. These ewes present as good shedders, with some shedding completely, and most only retaining fleece along the backline. Being 2015 drop, the mouths of these ewes are showing signs of age, 12 were well worn, or broken at assessment, however the ewes are in a strong 3 score condition, and with the season continuing to be extremely favorable, they should have no trouble raring their lambs into the Autumn, and early winter. Please note, a number of these ewes are carrying skin blemishes typical of shedding breeds with age, not considered detrimental, please reference photos.
