| Assessor Comments                               | A rare opportunity to secure a line or a selection of these clean shedding, high carcass yeilding Eyre White Composite young ewes. These ewes have been selected with the aims to; fully shed by October to reduce grass seed damage, stay in the paddock, be tough enough to autumn lamb on dry feed and lastly still slot into the local prime lamb markets at 18-20kg or heavier. The wether portion of the same drop were sold as 26 kg carcass lambs and yielded as a whole at 45%. The line of ewes have had a ram put in when they were 11 months old and then they have been scanned empty. The vendor has been breeding Eyre whites for over 20 years and has had outstanding results. If you are looking for clean shedding ewes then don't look past these ewes. |
