Assessor Comments	Very neat line of plain easy care Nantoura blood young Ewes, SIL to the White Suffolk. Ewes have scanned up extremely well at 137% overall, after a tight 6 week joining period in feedlot with extra Rams. Scans consist of 72 twins (blue rattle) and 78 singles (no mark). Please note; photos still have the 12 dries (red rattle) that will be taken out prior to delivery. Renown bloodline for fertility and long free growing wool. Good opportunity to purchase Ewes with everything done, allowing them to hit the ground producing dollars with the rest of their lives in front of them. Please note; Ewes will have extinosad before departure off property, as there is a very slight suspicion of potential lice, though none was found on inspection.
