Assessor Comments A line of 24 healthy Angus x heifers that have been drenched with Flukazole and had their 7in1 booster shot in september.

These heifers are well grown and showing plenty of shape for their age, and have never been with out nutritious feed and would continue to stack on the weight and could make the ideal F1 mothers. Please note the vendor is offering 2 other lots in this sale as well. Please Note; some have been treated for pinkeye in the last month and will have a small amount of scarring.
