	Fractious young calves, that haven't spent a lot of time away from their mother. Despite their anxiety, none showed any signs of aggression during the drafting or weighing process. Just wanting to rush through gateways and getting a bit claustrophobic in the crush. The weaning process will help with this , as well as further handling & education post delivery.		
Handled With	Bikes , On foot , Vehicles		
Assessor Comments	Very stylish draft of Heifers. Tops of their drop and outstanding bodies in every way. Renowned Charolais/Angus Hybrids that perform in any chosen market. These females carry all the best traits from either breed. Soft fleshing with muscles hanging off them everywhere & plenty of length & depth. These are ideal females for a short term investment, start now on a feed ration and target a supermarket job in the New Year, Alternatively, continue on the grass and target an export market. Calves weaned at assessment, please consider this in your adjustments.
