Health Treatments: Cows Vaccinated 19/05/2021 7 in 1

Chemical Residue	Clear - No known history.
Eligibilities	Russian Eligible Saudi Eligible
J-BAS Score	6

Vendor Comments	A good quality line of young crossbred cows with calves at foot. Cows are milking well and generally doing a good job on their calves. Calves are NLIS tagged but not cut or branded.

Joining Details	Station Mated bulls put in: 20/12/2021 bulls taken out: 15/02/2022 (58 days) Bull Breed(s): Angus To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.
Preg Tested?	No, this lot was not pregnancy tested.

Temperament

Yards	Crush	Paddock
Quiet: 33 head Slightly Stirry: 8 head	Quiet: 39 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

All cows worked well through the yards. Some cows did become quite agitated in the pound and force when being drafted, obviously impeding their flight zone and this was particularly evident if they got isolated. They did however settle down when they returned to the mob. They were very good to handle in the crush whilst being weighed and exited well. Definitely no cattle considered aggressive. Vendor did note they are very good to handle in the paddock on horses. Allow time to settle on arrival.

Handled With	Bikes , Dogs , Horses , Vehicles

Assessor Comments	A good quality line of Crossbred cows with calves at foot. These young 1st calvers have grown out well and presented in store to forward store condition. They are right in their breeding prime now and will offer a buyer many years of breeding. They have had the opportunity back to Angus bulls since 20th December. Would be advisable to put a bull back in after arrival just in case there are a few that have been missed. They are doing a pretty good job on their calves and appear to be milking well, only the odd calf that is marginally plainer in condition. Now that the seasonal conditions have changed for the better over a wide area of the eastern states securing breeders especially with a calf on the ground would be justifiable in any operation considering the sting in the weaner and yearling markets at present. Did notice 2 cows with old fly rub and an additional cow with needle lumps on the neck, no issues here. Note there are two lots in this sale to fill a 4.5 deck unit.
