Heifers were good to handle in the paddock and yards at assessment. During individual assessment (crush-side) a large majority of the heifers were happy to stand without pressure, however when mouthing a few more were noted to be uncomfortable with the close interaction. Heifers were fine in bigger yards in a mob and easy to count through gateway etc.

Handled With	Bikes , Horses , On foot
Assessor Comments	A small line of good quality, young, predominantly red commercial PTIC heifers with good confirmation and maternal traits that were joined to Charbray bulls. 1 creamy (Charbray Cross) heifer, 3 baldy faced (Hereford Cross) heifers, and 1 higher bos indicus content heifer with minimal hump present (Brahman Cross) were noted at assessment. Heifers were purchased as store heifers to go on to be replacement breeders in November from the Bell (Dalby) district but due to a change in circumstances, they are back on the market. Over 50% of these heifers were noted as polls and were joined to polled Charbray bulls. Please note Vendor has other heifers in the Weaner & Yearling Sale.
