Assessor Comments	An opportunity to purchase PTIC Angus heifers from a large commercial herd that has been very careful in the selection of bulls over the years, buying the bulls that meet their criteria chasing growth and carcass quality along with good temperament. These heifers are Scanned out of their keeper mob only on calving date, to calve from 14/8/22 - 30/9/22. Heifers are on a Pestiguard program and nearly due for annual booster. Heifers are joined to purpose bred heifer bulls by a fantastic proven heifer bull out of selected prove calving ease females. Vendor has bred and used these bulls extensively and is keeping and calving heifers joined to same bulls (just earlier calving from Scanning) Bull is a curve bending bull with low birth weight (+2.3) and +128 for 600 day growth. along with +17 for milk. These heifers have been very well handled and were a pleasure to work in the yards.
