Assessor Comments	Buyers, presented are a line of very good quality PTIC heifers. Near locally bred heifers that have really performed so well since arriving at Guyra 9-10 months ago as lightweight weaners. These provide restockers a golden opportunity to rebuild herds with quality now that the seasonal conditions are continuing over such a big area of Eastern Australia. These have all their breeding life in front of them and will be a worthy long term investment. They show very good carcass traits, plenty of shape, bone & volume with plenty of breed character and stacks of eye appeal. In the entire line I did note a couple with a very small amount of white on the udder. There will also be 1 heifer with a stumpy tail in the lot and a few with light warts and odd needle lump, no issues here. There are an additional 83 heavier heifers in three lines that can also be purchased and put with these.
