Assessor Comments	A nice line of Angus heifers providing well for their young calves. Heifers have been purchased and calved down specifically as part of the 'Timor Cattle' heifer operation. Heifers present in a store condition and have the ability, if given the chance to grow out into nice cows for the future. Calves are 1-4 weeks of age predominantly with a few older calves in lot. With all the hard work of calving down future breeders already done, this line of heifers and calves offer a excellent opportunity for the incoming purchaser to put together a good run of heifers. Please note (4) heifers noted with white under the belly, (2) heifer with a blue eye. (2) heifers were noted to have active pink eye along with (2) calves. They were treated at assessment with Pink eye cream. Will be active on delivery others may be in first stages in a weeks time. Take into allowance.
