Assessor Comments	28 PTIC Cows acc. "Rosedale Nominees" - Property sold forcing herd dispersal. 2019 Drop – 2nd Calvers. Cows were joined on the 20/07/21 to the 27/10/21, to CC late April. Please note calves have been weaned off cows a week prior to assessment thus reflecting the condition of the cows. These females have all been PTIC to Fernhill Angus bulls. Selection of bulls is a stringent process for the vendor with low birth weight, gestation, milk, growth, structural confirmation & temperament are all a key focus. In the past vendor had introduced Boss Indicus x Angus cattle into their breeding program meaning that there will be a percentage of these cows carrying Boss Indicus genes, this line has been drafted to phenotypically show strong Angus traits - Refer to media. Here arises an opportunity to secure a line of young future breeders with their lives ahead of them. At assessment 3 cows were observed to have old pinkeye scarring in one eye only. *Vendor offers another 4 lots in same sale*
