Assessor Comments	A good to very good line of predominantly Angus heifers that presented in forward store condition. They are scanned in calf to a Angus heifer bull to commence calving early march for a 8 week period. These heifers were purchased off auctions plus from a northern Victoria breeder and present in ideal condition to calve down. Please note pregnancy status of heifers and prompt delivery is advised. Heifers are just starting to spring up as seen in media. Please note, 2 heifers also presented with light blue eye scaring. Also note there are 3 heifers with white udders. Vendor also has another lot of PTIC heifers in todays sale with same joining details.
