	Quiet: 20 head	Quiet: 20 head	Temperament not assessed in Paddock
	Heifers were very good to handle in the yards & crush.		
Handled With	Bikes , Vehicles		

Assessor Comments	PTIC EU Rennylea Angus blood heifers, they are 19-20 months of age, scanned in calf to Rennylea Angus bulls from 2-3 months in calf. These heifers are only being offered as they are surplus to requirements, they were scanned into the second joining cycle, 65-80 days in calf at time of scanning, with only heifer scanned into the first cycle have been retained in the herd. These heifers will develop into medium/large framed matrons. Opportunities to acquire heifers of this quality don't come around everyday, and will not disappoint. Vendor also has another lot of 23 PTIC Rennylea Angus Blood heifers offered in this sale that were scanned 40-60 days in calf. Buyers please note 3 heifers with a splash of white on their udder. 1 heifer with a bob tail and 1 heifer treated for early signs of pinkeye at assessment, see media. At the request of the successful purchaser this heifer can be removed at delivery.
