Assessor Comments	6 Angus x Dairy heifers Not vendor bred. Double vaccinated with 5 in 1 vaccine, along with multimin and cydectin worm drench. These calves are currently being supplementary fed grain as well as quality cereal hay and a very small pick in the paddock, although the grass portion of their diet is minimal at this time of the year. These cattle are very quiet and easy to handle as they've been bucket reared by this vendor since birth and they present in excellent body condition, which is a credit to the vendor. These heifers will go on to make tremendous vealer mothers for any prospective buyer. NOTE: - One heifer had long toes trimmed at assessment. - 1 Heifer had a pinkeye scar treated 3 weeks ago
