|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assessor Comments  | 6 mixed breed beef x steers. These steers are not vendor bred. They have had both 5 in 1 vaccinations, multimin and a cydectin worm drench. These calves are currently being supplementary fed grain as well as high quality cereal hay and a small pick in the paddock also, although the grass portion of the diet is minimal at this time of year. These cattle are quiet, easy to handle and bucket reared. They present in excellent condition, which is a credit to the vendor. |
