Cattle were sexed prior to weighing process and were good to handle with only having a week weaned. Cattle displayed knowledge of yards and were not aggressive or fast to handle. Cattle in race did tend to jump on each other under confined spaces and pressure. In the paddock they are very quiet with the vendor always hand feeding them bread each day and walking through the mobs.

Handled With On foot , Vehicles

Assessor Comments Outstanding line of Angus X Heifers. Heifers have been thriving on native pastures and will keep progressing through the summer months with ample of feed. Heifers which are presented in forward store condition running on pasture and currently weaning onto silage, showing great shape, frame and structure and would suit any small block to grow out into heavier kill weights of for a future breeder program. Grass fed & antibiotics free ****Buyers Note**** Steer portion in same sale
