	Heifers were mustered in the morning with motorbikes and dogs with no problem at all. They were left 6-7 hours to cool down and when weighed individually and preg tested, majority stirred up in some way but very quickly calmed when put back with the mob. As a mob in the yard, a handful were a little fizzy with majority being fine to handle.					
Handled With	Bikes , Dogs , Horses , Vehicles					
Assessor Comments	A great opportunity to buy a line of preg tested in calf heifers PTIC to angus bulls. Heifers were purchased as weaners directly out of coastal sale yards in Queensland with the intention to do a PTIC trading job. These heifers will perform regardless of pasture quality and will continue to be proven breeders in the future . Majority of these heifers have a fine temperament with a handful inclined to stir up when singled out or handled with too much pressure.
