	Odd heifer when pressured was runny, typical of station bred cattle they were removed from there calves at this time aswell. Cattle walked through weigh box in single file without any hesitation in a very well mannered fashion.		
Handled With	Bikes , Dogs , Horses , Vehicles		
Assessor Comments	On display are 101 Composite X heifers, presenting in fresh store condition with 101 1-3 month old calves at foot. Calves are in fresh milky condition with angus and charolais influences with one calf noted to have more brahman features. Heifers present with full and firm udders and in an overall strong condition. All Animals have been performing with fast growth into evenly structured animals that are showing typical attributes to the breed with their hybrid vigour. Noted at assessment was 1 heifer with a busted grass seed lump under chin and 1 with pink eye. These animals represent an opportunity not to be missed, as an even line of heifers with calves at foot, an article that is hard to find. Note there is 1 smaller framed younger heifer in the mob and also 1 big Angus vealer heifer calf that is 3 months older than the rest of the calves. These heifers will grow into lovely matrons for the future with a lifetime of breeding ahead.
