Assessor Comments	A line of Angus heifers providing well for their young calves. Heifers have been purchased and calved down specifically as part of the 'Timor Cattle' heifer operation. Heifers present in a store condition and have the ability, if given the chance to grow out into nice cows for the future. Calves are 2-4 weeks of age predominantly with a few older calves in lot. It is recommended that (given the age of the calves) that purchases allow time for heifers and calves to re mother once delivered. Heifers and Calves have been tagged to avoid any miss mothering. There were approximately 4 dryer coated calves in mob. Please note (2) heifers noted with white under the belly, (3) heifer with a blue eye. (3) heifers were noted to have active pink eye along with (2) calves. They were treated at assessment with Pink eye cream. Will be active on delivery others may be in first stages in a weeks time. Take into allowance.
