| Assessor Comments   | Heifers present in light store condition and offer a great opportunity for purchases to acquire a line of females to continue to join or to carry on to feeder weights. Heifers have been tested empty 8 weeks ago and were identified by a bang tail. 100% PTE can not be guaranteed as the heifers were put back in the paddock with Angus bulls. Some heifers have had calves weaned off them recently. Heifers were good to handle through yards at assessment.(3) heifers had active pinkeye which please see documents. (2) heifers with Blue eye. (1) heifer with an old lump under neck. |                                           |                                     |
