Handled With	Typical of type. Odd heifer stirred a little through process, although nothing abnormal, settled quickly enough back into mob Bikes , Dogs , On foot , Vehicles		
Assessor Comments	A handy three deck line of composite XB heifers. As mentioned have been depastured to Bongongo Angus and Rockingham Santa bulls since 18th of November thru until assessment. Heifers presenting in good forward condition so should not have had any problem joining up. A nice style of heifer, if running through to calve is not the plan, an injection and they are an ideal load of feeder heifers. Heifers with plenty of stretch and shape. We mouthed fifty odd heifers at assessment majority are milk with around 20% with two teeth just cutting or up - no sign of anything older. If your looking for a bit of value in the current environment a line of cattle well worth a close look.
