Assessor Comments	Opportunity to purchase a line of crossbred cows with Angus sired calves at foot. Cows averaged 432kg (361kg - 620kg) and calves averaged 108kg (38kg - 145kg). These cows are doing a great job on their Angus sired calves - all calves are straight black or black baldy in appearance with approx. 6-7 head showing small amount of Bos Indicus influence (see media). Calves will make a very marketable line in the future. Please note; one smaller calf only a week old (see last photo) and one calf treated with antibiotics a month ago (identified with red visual tag to comply with most Grassfed programs). Ideal units to either rejoin or fatten and split.
