	Excellent temperament and well educated heifers, worked through race and draft with no concerns. small percentage became slightly agitated in the crush during weighing and mouthing. heifers have always had excellent feedback from buyers and are well known for their temperament and performance.							
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , On foot , Vehicles							
Assessor Comments	3 decks of very good quality Droughtmaster heifers joined to registered Glenlands and Powermac bulls for a short 3 week window in February. These heifers are part of vendors replacement heifers and are being offered for sale due only to deteriorating season on Vendors fattening properties. 100% x 1 brand, vendor bred and milk tooth with plenty of softness about them, genuine front paddock heifers with all their breeding lives in-front of them. A very good quality line of replacement quality heifers that would be an asset to most breeding enterprises. Heifers of this nature rarely hit the market, carrying leading Droughtmaster genetics including Wajatryn, Glenlands and Medway to name a few. Commercially accredited heifers well suited to southern markets and tried and tested in the north, these heifers will not look out of place wherever you take them. 100% Reds and honeys, large percentage of polled heads and excellent temperament. buy these heifers with confidence.
