Assessor Comments	These cows and calves have been pre-treated for ease of movement into the clean country and vendor is prepared to treat again and clear on farm at their expense if required. These cows arrived from North of Croydon mid December in backward store condition and had been doing it tough. They have been enjoying a great season at their new home and have turned the corner and are starting to do and put some milk into their calves. They have been running with Brangus and composite bulls up until assessment. Ideal trade units or top up numbers and wean the calf on them and get another calf out of them. Please note one cow has a stumpy tail, and one cow has a second eye lid but does not impair her or her vision at all. (please see photo) Vendor also has another 3 decks (62 head) of PTIC cows in the same sale.
