Assessor Comments	95 cows with 82 calves at foot. Cows have had access to Charbray bulls. Ideal article to put onto good feed and split at a later date. Majority are medium to large frame cows that are doing an exceptional job on calves. Heifer portion av198kg, the steer portion av188kg. Of the 50% weighed they ranged from 130 to 250kg with one steer weighing 70kg. He was a stand alone calf in the mob possibly with a less productive cow. 2 calves were noted to have small navels. One cow with a dog bite, Approx 8 cows with slight hips offs & one cow with visual split in the hoof on the back leg but was viewed to not impact walking at time of assessment. please view last photo. Excellent quality Brahman calves that are thickset and a great topline to carry the weight through after weaning. Don't miss an opportunity to value add to your trading operation. Please note that the station mated cows that are not counted as a unit with a calf will have a reduction of \$1500 from the unit sale value.
