Assessor Comments	A line of vendor bred PTIC cows out of a large commercial herd. The vendor has been carefully breeding using high indexing sires for IMF and growth and are joined to bulls that are also high indexing bulls. This mob of Cows are excess to the vendors requirements as numbers have grown since the drought and have a lot of young females coming on. Three cows have white on the underline, Two cows have old pink eye scaring not considered detrimental and do not appear to affect vision.
