Handled With	Generally a very good mob of Droughtmaster females to handle. Obviously well handled and educated from their property of origin. Flowed through the process well. Were good cattle to muster. Pleasure to work with Bikes , Dogs , On foot , Vehicles		
Assessor Comments	A very nice line of Droughtmaster no9 branded young cows PTIC for their second calf. Bred originally in Richmond North Queensland from the renowned Lazy A Droughtmaster stud and have run at "Wirchilleba" for the last 18 months. Have been depastured to Bongongo Angus and Rockingham Santa bulls since the 1st of August last year and have been preg tested in calf to be greater than 4 months by Tom Graham of Coolac Veterinary Clinic. Very well educated and easy to handle for Bos cows - after a long day of mustering and drafting there was no playing up at all. All raised a live calf through to weaning and did a great job on them at that! Please note the stipulated delivery dates due to remote location if you could work to this would be greatly appreciated - if its a drama talk to myself. These young breeders are something special - consider closely.
