	Generally a very good mob of Droughtmaster females to handle. Obviously well handled and educated from their property of origin. Flowed through the process well. Were good cattle to muster. Pleasure to work with	
Handled With	Bikes , Dogs , On foot , Vehicles	

Assessor Comments	A very nice line of Droughtmaster PTIC Heifers. Assessed as an entire mob of 96 but being offered in two even two deck lots. Bred originally in South Western Western Australia and have run at "Wirchilleba" for the last 12 months. Have been depastured to Bongongo Angus bulls since the 1st of August last year and have been preg tested in calf to be greater than 4 months. Very well educated and easy to handle for Bos heifers - after a long day of mustering and drafting there was no playing up at all. As mentioned previously being offered as two even as possible lines and if they were to go to separate buyers will be delivered as such. Please note the stipulated delivery dates due to remote location if you could work to this would be greatly appreciated - if its a drama talk to myself.
