Assessor Comments	A very nice line of Droughtmaster PTIC Heifers and cows - 14 no.9's & 39 no.0's. These are the later calving heifers / cows out of the entire line. Bred originally in Richmond North Queensland from the renowned Lazy A Droughtmaster stud and have run at "Wirchilleba" for the last 18 months. Have been depastured to Bongongo Angus and Rockingham Santa bulls since the 1st of August last year and have been preg tested in calf to be less than 4 months by Tom Graham of Coolac Veterinary Clinic. Very well educated and easy to handle for Bos heifers - after a long day of mustering and drafting there was no playing up at all. Please note the stipulated delivery dates due to remote location if you could work to this would be greatly appreciated - if its a drama talk to myself. Although later calving these are a really classy line of young females - worthy of close consideration.
