Assessor Comments

A very well bred and presented line of August/ September 2020 Drop PTIC Angus Heifers. Presenting in ideal condition to take home and manage for a spring calving. Out of an excellent Rennylea cow herd, the heifers have been joined to LBW Rennylea Bulls. Ellendon's sire selection focuses on structure, fertility and 400 & 600 day weights. Feeder steers from the heard reach feeder weights at 10-12 months. These heifers are offered for sale as they have been identified to calve in approx the last 3 weeks of the calving window. Heifers should commence calving approx 20th September for 3 weeks.
