J-BAS Score	6							
Vendor Comments	All cows calved for us and we left bulls in with this mob. Very good to handle and season has helped cows do a good job on these calves.							
Joining Details	Station Mated - Continuously Joined Bull Breed(s): Angus							
Preg Tested?	Yes, this lot was pregnancy tested, by Em Warner (Vet, NCPD ID: 1377) on 04/04/2022. 2 Head (6.7%) PTIC, from 3 to 4.5 months (at time of assessment 04/04/2022). Certificate Available.							
Other Joining Details	There were 4 cows extra than calves. We selected dry cows to test. We deemed the majority of cows may have been too early to detect.

Assessor Comments	Presenting a nice lot of Angus cows and calves which have had access to the Angus bulls since calving. As there were 4 more cows than calves we preg tested any that looked dry and found 1 to be red tag, 1 blue and anything dry and empty was removed. The red tag cow will have a reduction of \$300 on sale price. The cows are mostly large framed and forward in condition and doing an excellent job on their calves. The calves are fresh and weigh 137 kg average. The cows averaged 617kg after overnight lockup. Two cows have dropped udders, 1 cow has a damaged teat but generally the cows have good functional udders. Three cows have a blue eye on one side. Two of the calves have a blue fleck through coat. Generally, a nice lot of Angus cows and calves. Please note Friday morning last delivery opportunity.
