	Fair cows to handle. Can get a bit of pace up if rushed or stressed. I drafted reject cows out in a large yard and taking ones time and not rushing the cows they are fine to work. In the paddock I have always found these cows to be fine when inspecting, easy to drive up to never have been ones to head for the hills. In my opinion their temperament is acceptable but should be noted.		
Handled With	Bikes , On foot , Vehicles		
Assessor Comments	A very nice line of cast for age PTIC Angus cows from one of the most well renowned herds on the central tablelands whose weaners are a standout every year at the local CTLX Blue Ribbon Weaner sale. 2013 drop cows only being sold due to sale of acres and now excess to requirements. Normally would have been retained in herd until they naturally fell out or a dry time dictated their sale. Preg tested in calf to the Landfall sires with predicted calving dates from first week July through first week October. I went through the cows closely at assessment and any long toes or other indiscretions were removed. Approx 10 cows were mouthed, generally were good and solid there were a couple quite worn & I removed from the mob one cow that was broken - note photos. Offering as two even lots of 39 head. Note delayed settlement is being offered on these cows with payment at end of August only through an ALPA member agency so should be cows and calves by time payment is due. Consider closely
