|                   | Weaners were assessed straight after mustering, some became agitated when pressure was applied in force yards and crush, quick to settle when released back into main mob - typical weaner behaviour.                                                                                                                                                                                                                  |      |                         |      |                             |      |              |      |

| Assessor Comments | A line of genuine Vendor Bred Weaner Steers, sired by Speriby North Angus Bulls out of a composite cow herd. At assessment the Steers weighed from 240-345kg to average 308kg full, with a projected delivery average of 293kg. The Heifers present in a forward store condition and will continue to run with the cows up until delivery. Please note sister lot is in the same sale, also the short delivery period. |      |                         |      |                             |      |              |      |
