Assessor Comments	Outstanding line of Angus weaned heifers, bred in the purple, with purposely selected genetics on both sides of the pedigree, these calves are the progeny of first calf 2 year old heifers, full Eaglehawk bloodline's, sire's are 3 great Wattletop bulls, 1 of those was semen collected, used in an AI program on the first calve heifers then used as a back up bull, very good Angus types, with volume, medium frame and do-ability, heifers well weaned, socialised and tailed out with good dogs, ease of handling in yards and out was evident, a very small top & tail was removed from mob, this is the bulk of the heifers, buy with extreme confidence that the depth of bloodlines and management will shine through in these future breeders, 4 heifers with white bellys. small % with old pinkeye scars, odd one active at assessment and was treated, heifers will checked at delivery ### steer portion also in this weeks sale
